Apple Lisa LABEL structure :

Label - 128 byte object that is associated with a file in the Lisa FS.  
Labels are to my knowledge used only by the Lisa Desktop Mgr.

Structure: (total size = 80 bytes)

- |    |          |               |            |
|----|----------|---------------|------------|
| 1. | version  | (integer)     | (2 bytes)  |
| 2. | name     | (string [63]) | (64 bytes) |
| 3. | kind     | (integer)     | (2 bytes)  |
| 4. | toolOnly | (boolean)     | (2 bytes)  |
| 5. | multiDoc | (boolean)     | (2 bytes)  |
| 6. | windLoc  | (rect)        | (8 bytes)  |

other fields exist, but I can't find any info about them
