

MATH BLASTER *Plus!*TM

Dear Parents and Teachers,

As a parent and teacher myself, I know what Math Blaster Plus will do for your children. It will help them build a sound foundation in math. It will make learning exciting and fun. But most important, your children will achieve success as they learn.

Math Blaster Plus, like all our software, was designed by teachers and tested in classrooms. Davidson software has received many awards from parent, teacher, and industry organizations. While we are proud of our awards, the letters we receive from parents, teachers, and students who use and love our software are a greater source of pride.

Please let me hear from you. Your children's successes are our greatest reward.

Jan Davidson

Jan Davidson, Ph. D.
President

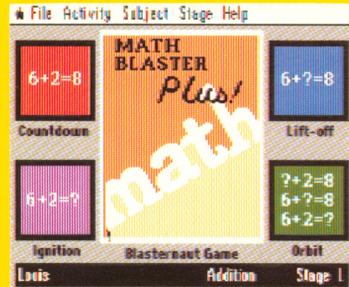

Grade Level

1st Grade through 6th Grade

Objective

To build basic skills in math fundamentals:

- Addition & Subtraction
- Multiplication & Division
- Fractions, Decimals & Percents

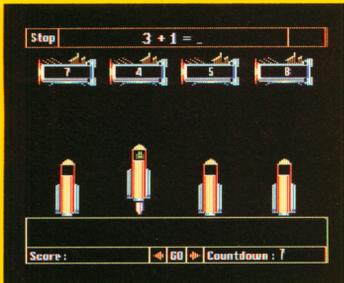

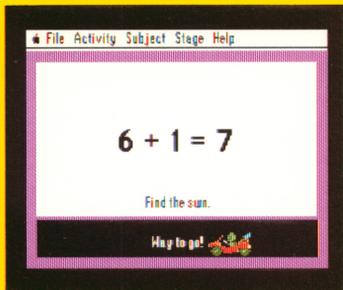

Math Blaster Plus is easy to use with pull-down menu access from either a mouse or keyboard.

Math Blaster Plus Features:

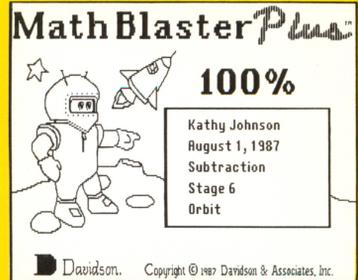

- Over 750 Math Problems
- Five Motivating Learning Activities
- Animation and Color
- Printed Certificate of Excellence
- Re-Take Option for Difficult Problems
- Student Record-Keeping
- Test Maker
- Easy-To-Use Editor

Math Blaster Plus uses positive reinforcement to encourage students as they learn.

Students will spend hours reviewing their math facts while playing the exciting "Blaster-naut" game.

The printed Certificate of Excellence motivates students with awards to encourage their success.
