128k Cookie Factory\$44.95

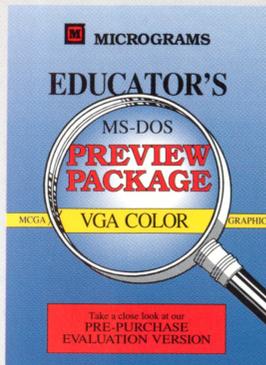

IBM Programs

Micrograms has recently developed MS DOS versions of some of our programs for IBM and IBM compatibles. These programs require MCGA/VGA graphics and DOS 3.3 or greater. IBM prices shown are for the Installation version which can be installed on all stand-alone hard drives within a given school building. Look for more new MS DOS programs from Micrograms.

Apple Network and Site License Versions

All Apple programs listed within this brochure are available for the Digicard SRC. Site License agreements are available for all Apple programs. Call for pricing.

Call 1-800-338-4726 to request your FREE CATALOG of Micrograms Apple software.

Micrograms Preview Service

We are aware that previewing software is the best way to make intelligent software purchases. In an effort to provide a preview service to educators, Micrograms has developed a PREVIEW PACKAGE for both our new Apple programs and our new IBM programs.

The preview disks, which need to be returned at the end of the preview period, contain a few technical differences from the purchase versions of the programs. However, the student activities are identical, allowing you to conveniently and accurately assess the educational value of each new product.

We at Micrograms welcome you to take advantage of our preview service and hope that our new PREVIEW PACKAGES will become a valuable step in your software evaluation process as you work to locate the best software for your students.
