COMPUTER LEARNING GAMES

## BUMBLE PLOT™

FIVE CHALLENGING GAMES THAT TEACH NUMBER LINES, NEGATIVE NUMBERS AND GRAPH PLOTTING. AGES: EIGHT TO THIRTEEN.

# ABOUT THE LEARNING COMPANY.

We're the leaders in computer learning games for young children. Before us, no one else has offered playful computer software that takes a serious approach to interactive learning for children.

Our games let children learn to enjoy the learning process, enlivening their imaginations, expanding their creativity, and sparking their thrill

of discovery.

Each one of our games is simple and easy to use. They come on floppy disks and run on Apple computers. Even the youngest of children have no problem working alone on games designed for them after a couple of adult-supervised sessions.

We will continue to introduce many more games to let children develop an even broader range of learning skills, helping them love to learn. We invite you to let your children grow up with us.

Computer learning games from The Learning Company are available at Apple computer dealers across the nation or directly from The Learning Company.

# BUMBLE PLOT™

Ages: Eight to Thirteen

BUMBLE PLOT is a set of five programs building on the graphing skills introduced in Bumble Games, also using the Bumble character. In Bumble Plot children use positive and negative numbers to name points in four quadrant grids.

Plotting number pairs is a basic math skill for the computer age. Children need this skill to understand and build charts and

graphs, to locate places on a map, and to design computer graphics.

The games are arranged from easy to hard, making the ideas natural to learn.

They feature color graphics that help children learn. They also feature music and sound effects that can be turned on and off.

Developed with math specialists and evaluated with children.
