Britannica Software

Introduce your family to our family.

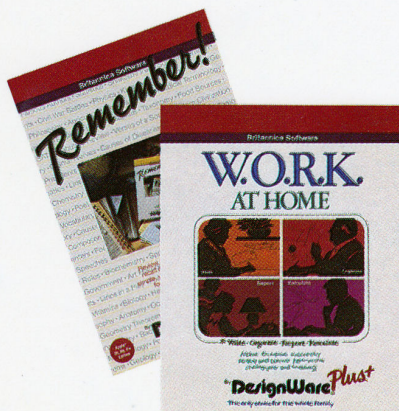

Working, playing, learning or relaxing, The Britannica Software family helps your whole family get more from life.

DesignWare® Plus

For school, for work, for home, DesignWare Plus makes it easier to handle the serious business of living.

DesignWare Plus is a new approach to software for the family. With DesignWare Plus, adults and children can take care of daily activities easily and efficiently. Designed from the ground up to be easier to use—and more useful—than the alternatives, DesignWare Plus software will find its way into your computer any time you really need to get things done.

- Take care of the business at hand, without getting bogged down by your computer.
- Helps organize, keep track of details—for busy students or busy parents.

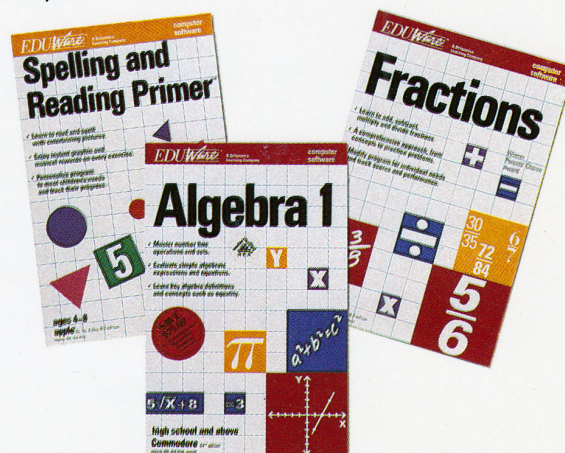

EduWare®

Don't play games with learning.

EduWare products teach children valuable skills, without leaving out the pure enjoyment that comes from mastering a subject. Because EduWare helps kids with skills they'll need for the future, it's serious stuff—but learning can be fun, without being simplistic.

- Children study at their own pace, skipping what they know, reviewing where they need to.
- Covers all levels in the most important skill areas: spelling through writing, numbers through algebra.
- Comprehensive, step-by-step sessions provide a detailed understanding of subjects.

Blue Chip Software™

Where would you like to earn your fortune?

In the stock market? Real estate? Commodities? Maybe you'd like to manage your way to the top of a major corporation—or just build your personal investment portfolio. With one of Blue Chip Software's powerful financial simulations you can learn the terms, the mechanics, the financial realities of each market. Blue Chip simulations let you get your feet wet—without taking a financial bath.

- Set goals, make investment decisions, commit resources.
- Simulations factor in weather, geopolitics, strong and weak financial markets, and other realities.
- See the effects of both short and long term strategies.

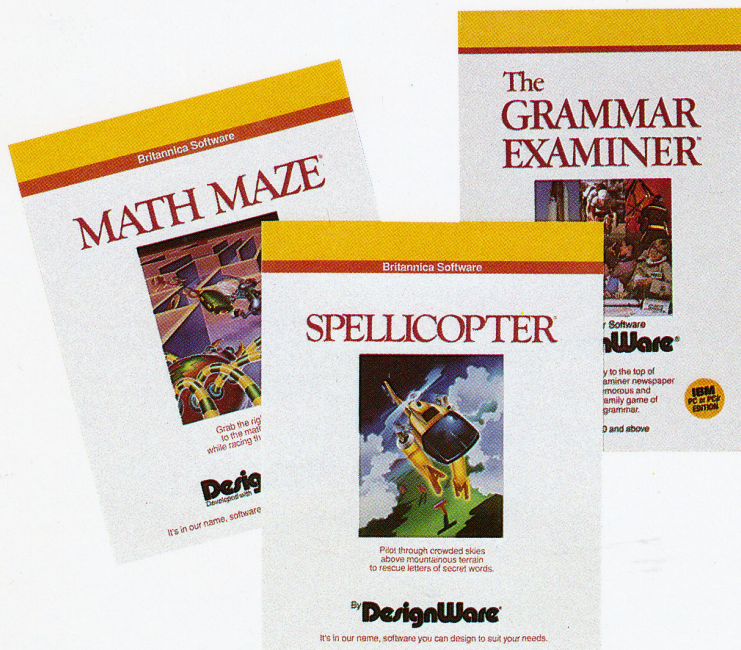

DesignWare®

Valuable learning experiences that are also fun.

Every child has unique learning needs. So DesignWare programs start with each child at his or her own level, then grow with them as their skills grow. DesignWare products challenge players on two levels — academically and in game-playing skills.

- Game play makes homework fun, encourages success in school.
- Your child learns important “core” subjects — math, spelling, grammar, geography, and more.
- Programs are expandable to contribute to children's success for years to come.
- Easy to use, with simple, straightforward commands.

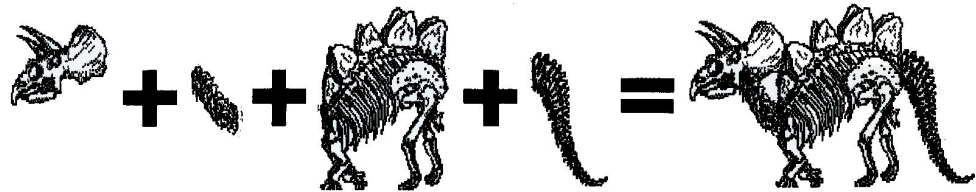

Three *Dino-mite* Activities!

SCREEN APPEARANCE MAY VARY BY COMPUTER

Survive as a Brontosaurus, Stegosaurus or Tyrannosaurus Rex in this learning game with multiple skill levels. Walk through forests, swamps and mountains. Eat the right foods along the way. Avoid predators. And watch for natural disasters. Everything you do affects the delicate ecological balance. So watch variables like *vegetation*, *herbivores*, and *carnivores*. And see

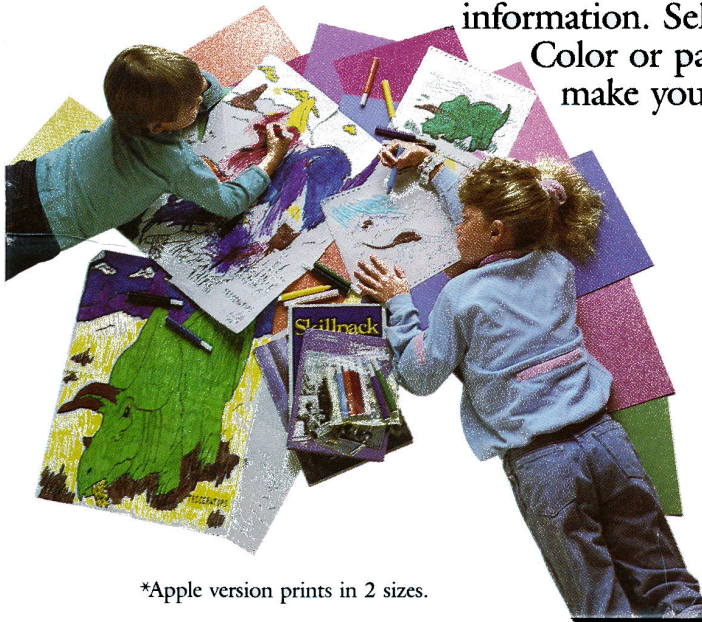

if you can live long enough to win a certificate to the Dinosaur Hall of Fame.

Create

prehistoric giants from a collection of fossilized dinosaur bones. Select a head, neck, body and tail from the museum files. Then put them all together. Give your new creation its own special name. And print it out complete with paleontological information.

Print out 12 different dinosaurs. Each complete with descriptions and information. Select from 3* sizes: report, poster or jumbo. Color or paint them. Hang or frame them. Even make your own dinosaur book!

Important Points for Teachers and Parents on the Educational Value of Designasaurus

- Teaches biological classifications, food chain theories, ecological balance and prehistorical events
- Develops basic problem-solving skills
- Stimulates creativity, independent thought and scientific curiosity.
