

Super Mario Bros.[®] Print World

*QUICKSTART
Manual*

Thank you for buying **MARIO PRINT WORLD**, the easy to use professional program. The enclosed quick start instructions will enable you to get up and running immediately. Due to technical delays in production, the complete program manual was not available for inclusion in this box. We apologize for any inconvenience this may have caused you. To receive your complete program manual, please complete the enclosed registration card and check the box, **Manual Required**. A complete program manual will be sent to you at no charge and you should receive it in 4-6 weeks.

These instructions, along with the on-line help screens should have you printing like a professional in no time at all. Thanks again for purchasing **MARIO PRINT WORLD**.

SUPER MARIO BROS.[®]

PRINT WORLD

QUICKSTART

INSTALLATION: **MARIO PRINT WORLD** can be used with either two 5 1/4 floppy drives or from a hard drive. To install on your hard drive, type hard drive's letter (example: <C>:). Create a directory by typing <MD MARIO >. Move into that directory by typing <CD MARIO >. Copy the files from the two program disks by using the DOS COPY command.

Example: A: Copy *.* C:

To use with a dual floppy system, place disk 1 in drive A; and disk 2 in drive B:, move to drive A: and type <MARIO >.

PRINTER AND HARDWARE CONFIGURATION

Printer choice: From the Main Menu, choose PROGRAM SETUP. Then select PRINTER CONFIGURATION, then from the printer setup mode, choose CHANGE PRINTER. Select your printer from the list and press ENTER. If necessary, change your paper size from the CHANGE PAPER TYPE menu.

Screen/video configuration: **MARIO PRINT WORLD** automatically detects the optimum video card and resolution, but they can also be manually selected from this menu.

Personal preferences: The level of ALERT MESSAGES and the type of measurements desired are controlled by this menu.

QUICK START TUTORIAL

The following is a quick walk-through of some of the basic features of **MARIO PRINT WORLD**:

From the MAIN MENU select "Create a sign or poster." The "Create a new document" will come up, where you will be prompted to give a name to the document, and to enter your name or ID (this is optional, Press Enter at each line to go on or name your document). Next, select a size for the sign from the SIZE screen, and the orientation, PORTRAIT, (Vertical) or LANDSCAPE (horizontal). For the purposes of this tutorial, choose PORTRAIT as the ORIENTATION and the SIZE to one full page (sizes can vary from a portion of a page to a multi-page mural).

The next screen is the main Sign creation screen. Here you can select the **Graphics**, **Borders**, and **Text** of your document. These are the common elements to all printed options.

GRAPHICS: Push <F5> to go into the MOVE/SIZE screen. Use the mouse or arrow keys to move the graphics to the desired spot. The number arrow keys will move the graphic in increments of 5 with NumLock on. The regular arrow keys move in increments of one. Toggle <Insert> key to change size of Graphic. Click the mouse on the middle of the blinking square to move to any spot on the document. To change the size, click on the side of the square and stretch or compress it, from very small to full page. Click on OK (or push F1) when done, and a preview of the Graphic will appear on the screen to the right. Click again, or push ENTER, and the graphic is selected. The main screen comes up again. (Multiple Graphics can be added by simply repeating the above process).

BORDERS: Click on BORDERS <F6> to move and size a border, Use arrow keys or mouse to position border as you did for the Graphics Box. To change size of border toggle <Insert> key. When OK, press <F1> and the BORDER STYLE menu comes up.

You can choose from:

BORDER STYLE: Choose "Repeating" borders if you want a graphic border. You must choose a BORDER NAME. Use <ENTER> for the border selection screen where you may select one of the custom borders already loaded onto the program. Again click once on the border to see it and click again or press <ENTER> to select. Other options: Single and Double line allows you to place a line border of the width you select, rather than a graphic.

THICKNESS: Next, choose the thickness of the border by clicking on the THICKNESS menu, and adding a number. (1, 2, etc and fractions expressed as 0.5, 0.3, and so on). If you default to 0, your border will not appear.

BORDER COLOR: The default is black. However, you can choose any color (if you have a color printer) or only grey tones with standard printer.

EDGE/CORNER: Allows you to eliminate portions of the border. By turning off the highlight, that portion of the border will NOT be printed. This allows you to select only corners, edges etc on your border print out.

When satisfied with selections on BORDER SCREEN press "OK".

TEXT: Press <F7> to bring up a Text box. Move and size Text box as you did for the Graphics Box. Press F1 when satisfied with position of text. Choose a type style by pressing STYLE <F8>. Then choose from Normal, Headline, etc. Type in your text, click on Exit or <F10> when you are complete.

To choose a font move cursor within style type brackets (ie. Normal, Headline, etc.). Then press <F3> Edit to access the Text Style screen. From this screen you can edit Margins, select Type Style (Fonts, Type Size and Font Effects). You can Justify your text to left, right or center.

To get more fonts select "Create a new style" and assign a three or more letter name to your new style. Click on FONT to access the fonts available. Or choose one of the pre-loaded fonts. Once you have typed in your text, use F1 through F8 or click on EXIT or push <F10>.

Position the cursor before the type you wish to print in bold (F1), Italics (F2) Underline (F3 or Superscript (F4). Hit the appropriate function key. All text following that function will appear in text format (bold, italics, underline, superscript, etc.). See hot keys card for additional text formats.

F5 Mark: Use the F5 key to mark the beginning of the Block. Cursor to the end of your desired block. Pause the cursor at the end spot and your Block will be accomplished.

Use F6 to cut or eliminate the Block. Cursor to the desired location to paste (F7) or insert the blocked text.

To Edit (reposition, resize, delete, move, etc) Graphic, Text or Borders, press the **Up Arrow** until the respective box is highlighted. Press <Enter> for the edit change menu. Make certain the menu title is the same as the feature you wish to edit (Graphic, Border, Text). This is very important if you position any text over graphics or borders.

ZOOM <F2> allows you to magnify certain parts of your document for closer examination. Clicking the lower left corner of the document screen will zoom in, clicking the lower right will zoom out.

PREVIEW <F3> allows you to see your document before printing it out. Clicking the mouse on the upper right corner of the document screen will also preview your work. Clicking on the upper left corner will return to normal mode. This can be used at any time to view your work in process.

SAVE <F1> brings up "Save Document" screen. You can change the name of your document here if you wish. Choose "Save" and enter a filename for your work. The filename must end with .PPD.

Example <FILENAME>.PPD

PRINT <F4> brings up the "Print Options" menu, At this menu choose the amount of copies (up to 99, 999 copies), the scale (reduction, enlargement or normal), and the print style. Then you can print your document.
