
Applesoft lowercase support

Applesoft now lets you do all your programming in lowercase. When you list your programs, all Applesoft keywords and variable names are automatically in uppercase characters; literal strings and the contents of DATA and REM statements are unchanged.

Apple II Pascal

Apple II Pascal (version 1.2 and later) can now use a ProFile hard disk through the Pascal ProFile Manager.

To find out more, see the *Pascal ProFile Manager* manual.

The Pascal 1.1 firmware no longer supports the control character that switches from 80-column to 40-column operation. This control character is no longer supported because it can put Pascal into a condition where the exact memory configuration is not known.

System Monitor enhancements

Enhancements to the Apple IIe's built-in Monitor (described in Chapter 5 in this manual) include the following:

- ☐ lowercase input
- ☐ ASCII input mode
- ☐ Monitor Search command
- ☐ the Mini-Assembler

Interrupt handling

Interrupt-handler support in the enhanced Apple IIe firmware now handles any Apple IIe memory configuration.
