Peripherals for your Apple Computers

- **quikLoader**
- **SWITCH-A-SLOT**
- **Paddle-Adapple**
3 VERSIONS
 - **9-16 Adapter**
 - **EXTEND-A-SLOT**
 - **PROMGRAMER™**
- **D Manual controller**
- **THE MAGIC KEYBOARD**

Paddle-Adapple

The **PADDLE-ADAPPLE** is a game plug expansion adapter that plugs into the interior game I/O socket, and is designed to operate in one of two modes. In the first, it allows you select between one of two devices, such as Koala Pad™ and joystick. The device is selected by the flip of a switch. In the second mode, the **PADDLE-ADAPPLE**, with appropriate software, allows the use of two joysticks simultaneously.

There are three versions to adapt to any combination of the newer type APPLE connector (the 9-pin D sub-miniature), or the older 16-pin plug.

- The **PADDLE-ADAPPLE** has two 16-pin sockets.
- The **PADDLE-ADAPPLE 'D'** has two subminiature 'D' (9-pin) connectors.
- The **PADDLE-ADAPPLE COMBO** has one 'D' subminiature and one 16-pin connector.
- Works with all APPLE compatible joysticks, paddles, and other devices.
- Select one of two devices or...
- Use two joysticks simultaneously.
- Unique configuration socket allows you to reconfigure the **PADDLE-ADAPPLE** to meet your needs.
- Recommended for two-player games such as **One-on-one** and **Archon**.
- Supports shift-key modification.
- Exchange X and Y joystick axis.
- Four push-button inputs possible.
- Small and compact – adheres to computer with supplied foam tape.
- All strobes, annunciators, and power available on all 16 pin connectors.
- Supplied with 18" (45 cm.) cable.

\$29.95

//c KEYPAD kit

This kit will give you an "embedded" keypad within your built-in keyboard. You may instantly switch between the keypad or the standard keyboard. **CAUTION** - Requires expert desoldering and soldering ability, and disassembly of the computer. Estimated installation time - about one hour. Comes with step-by-step illustrated instructions, new keyboard PROM, solder, socket, and a set of decals for the keycaps.

\$29.95

9-16 Adapter for APPLE //e & //c

The 9-16 adapter permits the use of most 16-pin I/O devices with the APPLE //e or //c. Plugging this adapter into the subminiature 'D' connector allows the use of 16-pin device, such as the **PADDLE-ADAPPLE**, paddles, joystick, 16 pin Koala Pad™, etc. The only limitations are those devices that use the annunciators or the \$C040 strobe, such as the **POWER PAD™**. Please note that the //c does not support two joysticks.

\$14.95

16-9 Adapter for APPLE][and][+

With this adapter, owners of early APPLES can take advantage of the newer 9-pin game products, such as paddles, joysticks, **MUPPET LEARNING KEYS™**, etc. **NOTE** - If you have more than one game I/O device, consider purchasing our **PADDLE-ADAPPLE COMBO** instead.

GENERAL INFORMATION:

The following information applies to all our products:

- Made in U. S. A.
- Six month warranty
- Ten day trial period - Money back if not satisfied.
- All peripheral cards are double sided with plated through holes, gold connectors, and solder masked both sides.

TRIAL PERIOD

Our trial period allows you to decide if our products are suitable for you, under actual operating conditions. Within 10 days of receipt of product, you may return it for refund if you are not satisfied. Returns made between 11 and 30 days are subject to a 20% restocking fee.

ORDERING INFORMATION

Our products are carried at many dealers. Check with your local dealer first, for fastest service. To order directly from us, you may use the order blank to the right, or call our order line:

quikLoader™

Designed by Jim Sather

SPEED

The **quikLoader™** allows *instant* loading of programs. APPLESOFT™, Integer, and machine language programs can be loaded in fractions of a second. More importantly, DOS is instantly loaded every time the computer is turned on. Integer is even loaded into the language card. This process takes less than a second, saving valuable time. The **quikLoader** operating system can keep track of over 250 programs when stored in **EPROM** (Erasable Programmable Read Only Memory). The user can transfer programs to EPROM using the instructions included with the unit, and any EPROM programmer (such as the **PROMGRAMER™**).

CONVENIENCE

How many times have you started to work with a frequently used program, only to find that you have misplaced the disk, or worse, had the disk damaged, or the dreaded "I/O ERROR" flash on the screen. With the **quikLoader**, these nightmares can be a thing of the past. Frequently used programs are available *instantly* when you need them, without having to look for the disk, or hoping that the lengthy disk loading procedure goes smoothly. If you do need to use standard disks, the **quikLoader** even speeds up that process. For example, to catalog a disk, just press ctrl-C Reset. To run the "HELLO" program, press ctrl-H Reset. Other "one-key" commands include entering the monitor, booting the disk, calling up the mini-assembler, etc. The major difference between the **quikLoader** and other ROM cards is the complete operating system (in PROM). This enables you to see the **quikLoader** catalog on the screen (by pressing ctrl-Q Reset). Loading or running the desired program requires one keypress. Program parameters, such as starting address and length of machine language programs can be seen on the catalog screen, if desired.

EASE OF USE.

The **quikLoader** plugs into any slot of the APPLE][,][+, or //e. The card is reset driven. To use any of the many features, RESET is pressed in conjunction with a key. The particular key pressed chooses the feature.

VERSATILE.

The **quikLoader** will accept all of the popular 5 volt 27 series EPROMs available. Single-voltage 2708, 2716, 2732, 2764, 27128, 27256, and 27512 types may be freely intermixed. Long programs can take more than one EPROM, and several short programs may be stored on one EPROM. The **quikLoader** operating system even handles multiple cards, so you can easily double or triple the amount of EPROM memory available. The ultimate memory capacity of one card is 512K, so many frequently used programs and utilities can be stored. We even start your library of programs with the most popular utilities on the card, FID and COPYA. Now, to copy a disk, you don't have to search for the DOS master. You can start copying within 3 seconds after turning on the computer.

INCREASED DISK CAPACITY.

Since standard DOS 3.3 is loaded every time the computer is turned on, it is not necessary to take valuable disk space with DOS. This will give you more than 5% additional space for programs and data on disks.

SYSTEM REQUIREMENTS.

The **quikLoader** will work in an APPLE][,][+, or //e. If used in a][or][+, a slightly modified 16K memory card is highly recommended in slot 0. A disk drive is required to save data.

FEATURES:

- Memory capacity to 512K.
- Instant loading of DOS 3.3.
- Includes Integer, FID, and COPYA.
- Seven empty sockets for your own programs.
- Commercial programs available.
- Slot independent.
- Works in APPLE][,][+, or //e.
- Operating system handles up to 255 programs.
- Multiple quikLoaders will increase EPROM memory.

\$179.50

DOS 3.3, Integer BASIC, FID, and COPYA are copyrighted programs of APPLE COMPUTER, INC. licensed to Southern California Research Group to distribute for use only in combination with quikLoader.

D MANUAL CONTROLLER

Designed by Jim Sather

This hardware product gives the user complete control over all I/O functions in the range \$C000 through \$C0FF.

Commands can be issued (via push-buttons) in the middle of a program, and the desired result occurs immediately, without interfering with the normal operation of the program. The card is slot-independent, and is connected to the control panel by a four foot cable.

\$89.95

PROMGRAMER™

Hardware design by Bob Brice

Software by Bob Sander-Cederlof

The **PROMGRAMER** is an inexpensive **EPROM** (Erasable Programmable Read Only Memory) programmer for the **APPLE][,][+, and //e** computers. The unit plugs into any slot of the computer, and allows the user to program any standard 5 volt, 27 series **EPROM**. Although not intended as a production tool, the ease of use allows rapid programming, copying, duplication, or modification of **EPROMs**.

FEATURES:

- Programs all single-voltage 27XXX series **EPROMs** from the 2708 to the 27512.
- Also does CMOS versions of above EPROMs.
- Choice of standard or fast programming algorithm.
- Disk-based software allows easy customization.
- Source code included (S-C Assembler).
- Files can be saved under standard DOS 3.3.
- On-board voltage generator—no messy wires or transformers.
- Zero-insertion force (**ZIF**) socket for ease in changing **EPROMs**.
- Complete—no personality modules needed.
- Slot independent for maximum flexibility.

\$149.50

SWITCH-A-SLOT

Designed by Joy George

The **SWITCH-A-SLOT** is an expansion chassis, which allows the user to plug in up to four peripheral cards in one slot. One of these cards is selected for use, and *only* that card draws power.

This product is especially useful where the software requires the printer to be in a particular slot, and the user wishes to choose between two or more printers.

- Allows up to four peripheral cards to be plugged into one peripheral slot.
- User selects desired card by front panel rotary switch.
- Only selected card draws power.
- Plugs into any peripheral slot.
- Saves wear and tear on delicate connectors.
- 18" (45 cm) cable connects SWITCH-A-SLOT to computer.
- Works with most peripheral cards.

SPECIFICATIONS:

- Power consumption; 5 ma from -5v supply, 60 ma from +5 v.
- Switched lines, ± 5 and ± 12 volt.
- Data, Signal, and address lines are unbuffered.
- Resistive termination on address, data and R/W lines.
- Size: $6\frac{1}{4}$ " W x $4\frac{1}{8}$ " H x 11" D (158mm x 104mm x 279mm).
- Chassis is made from heavy duty .062 aluminum.
- Accommodates cards up to $10\frac{1}{4}$ " (260mm) long.
- All connectors gold plated.

\$179.50

EXTEND-A-SLOT

The **EXTEND-A-SLOT** brings a slot outside your APPLE™, allowing an easy change of cards. The 18" (45cm) cable is long enough to allow placement of the card in a convenient location. the high quality connectors are gold plated for reliability.

EASY TO USE—just plug it in as you would any expansion card, then plug your card in. When you want to change cards, do it easily outside the computer, without the wear and tear on the computer expansion slot.

\$34.95

SWITCH-A-SLOT and **EXTEND-A-SLOT** work well with most slow to medium speed cards, such as modems, printers, clock, music, etc. They are not recommended for high speed data transfer devices such as disk drive controllers, alternate processor, and memory cards. Due to the nature of these products, and unit-to-unit variations of computers and peripherals, we are unable to guarantee that these products will work with any particular system. However, as with all our products, we offer a ten-day trial period. If our product does not operate to your satisfaction, return it for a prompt refund.

MAGIC KEYBOARD FOR APPLE][AND][ONLY

At the flip of a switch, select between the standard "QWERTY" keyboard, and your choice of DVORAK, A.S.K., MONTGOMERY, LEFT & RIGHT ONE-HANDED, and ALPHABETICAL ORDER. No matter which of the above keyboards you have chosen, you can then instantly switch between that keyboard and a numeric keypad.

- Converts APPLE keyboard to one of eight 10-key or hexadecimal keypads.
- Hardware conversion – compatible with all software.
- Decals provided.
- Works with any revision APPLE][or][+ (NOT for][e).
- Instantly switches between standard keyboard and keypad.
- Installs easily, no soldering.
- Does not use an expansion slot.
- Software compatible with all word processors.

\$49.95

SLOT 3 CLOCK™

Designed by Chuck Shaffer

Despite its name, the **SLOT 3 CLOCK** will plug into *any* slot of the APPLE][,][+, or][e. The main feature is that, unlike most cards, it can plug into slot 3 of the][e *without interfering* with the operation of the Extended 80-column card.

OTHER FEATURES:

- Fully Supports **PRODOS™**.
- **APPLESOFT™** compatible.
- Time and datestamp **PRODOS** files.
- Long-life **DURACELL®** lithium battery included.
- Installation software included.

\$79.50

DUAL KEYBOARD ADAPTER

for APPLE][and][+ only.

Many APPLE][owners have enhanced the computer by investing in an alternate keyboard. A major disadvantage is that the built-in keyboard is disabled. The **DUAL KEYBOARD ADAPTER** solves this problem by allowing the use of either keyboard. There are no switches, the user simply starts typing on either keyboard. The unit plugs into the keyboard socket of the computer, and both keyboards are plugged into the adapter. Installation is as simple as installing the second keyboard.

\$39.50
